

LYNX CENTRAL STATION

Orlando, Florida

Lynx Central Station, built to meet increased demand for Lynx service, is located in the heart of downtown Orlando. It is a permanent part of the city's ever-growing skyline. The \$36 million (\$20 million main facility construction) facility replaced the existing downtown station. The LCS includes an 18,000 sq. ft. air-conditioned seating area for riders with 2,400 sq. ft. for retail development. Riders have a wealth of amenities to enjoy as they wait to make their connection. The configuration of the facility's bus bays and walkways allows passengers to safely navigate between buses. And with a state-of-the-art lighting system, riders are certain to feel secure and comfortable at night.
